Institutional Distinctiveness

Kamrup College, Chamata, Nalbari, Assam pulled its door ajar in 1966 to impart knowledge to the first generation learners of rural areas of Chamata. This Institution has earned its reputation for being one of the premier Institution in the State which is well known for academics, sports and other extra- curricular activities. Being a Government Institution, the college has a nominal fee structure; which allows students from the socially/economically challenged backgrounds to get education in our college and therefore makes our college distinct in the district compared to other private colleges of the state, which have inflated fee structures. The performance of our students in examination is exceptional in spite of the fact that majority of them have a rural background.

The vision of the Institution is to mould, empower students in the pursuit of knowledge, values and social responsibility and help them achieve excellence in various fields, thereby also preparing them to face global challenges without faltering. The Institute has established its distinctive approach towards this comprehensive motto by patterning it in the form of service to the society, certificate courses or by allowing the students to organize events to develop their skills via multidisciplinary project development, Entrepreneurship development, Ethical and Human value development. The institution arranges different skill enhancement programs in due course to develop their skills. Students also undertake different internships in industries to pursue their projects by giving those hands on training in their field of interest. Recently in the year 2022, our institution has been approved to provide degree to the students in the Science stream as Bachelor of Science (B.Sc.) by the Government of Assam. The B.Sc. course has been commenced since October 2022. During its inception, the college has seen 82 new students' faces, which is extraordinary. Looking at the response and the enquiry about the Science course from the external public, it is expected that the institutions in the following years will enroll almost full seat in all

the courses under B.Sc. course. The college has formed Standard Clubs under the Bureau of Indian Standards (BIS) which allows the exposure to the Club member, which is basically the student members, to understand and spread the characteristics of the quality of the products that the society need to ensure about for their well being. The institution also organized the first ever National Science Day – SCIENTIA 1.0 in its own campus lead by the young and energetic faculties of the newly introduced Science stream. Response was emphatically overwhelming. Almost all the schools/colleges of the nearby areas participated gleefully.

The Institute also focuses on Global Standards, Value-based Education, Interdisciplinary Research, and Sustainable Development. The structured induction of the student into the curriculum enables to visualize the career opportunities and the approach towards achieving them. The institute provides a platform to business Start-ups to develop their ideas into commercially viable products.
